01 Executive Summary

Riscella Enterprises Limited is a premier Ugandan enterprise specializing in the compliance-verified sourcing, cold-chain distribution, and technical deployment of high-grade laboratory chemicals, analytical reagents, and durable laboratory consumables. Strategically headquartered on Sir Apollo Kaggwa Road in Wandegeya, Kampala, we serve as a mission-critical supply chain partner for manufacturing plants, industrial processing factories, and elite research institutions across East Africa.

We actively bridge the gap between world-class global scientific manufacturers and local industries. Our specialized logistics network eliminates supply-chain fragmentation, guarantees chemical lot purities, and minimizes procurement lead times. By buffering essential manufacturing reagents locally, we insulate your facility from volatile international shipping delays, ensuring that your quality control (QC), quality assurance (QA), and production laboratories never experience expensive operational downtime.

02 Corporate Information

Company Name: Riscella Enterprises Limited

Physical Address: Sir Apollo Kaggwa Road, Wandegeya, Kampala, Uganda

Email Address: riscellaenterpriseslimited@gmail.com

Phone Numbers: +256 705 728 194 | +256779062019

Target Sectors: Food & Beverage, Pharmaceuticals, Cosmetics, Water Treatment, Agro-processing, Higher Education, and National Research Laboratories.

03 Vision, Mission, and Core Values

Our Vision

To be the most trusted and preferred scientific supply enterprise across East Africa, recognized for our absolute commitment to standard-compliant testing and robust client technical support.

Our Mission

To empower scientific research and industrial quality assurance by delivering precise, reliable, and compliant laboratory supplies with unmatched logistical efficiency.

Our Core Values

Uncompromising Quality: Supplying only verified, high-purity assets from world-class audited manufacturers.

Regulatory Compliance: Strict adherence to national and international chemical and pharmaceutical standards.

Operational Reliability: Keeping local factory lines running continuously with robust local safety inventory.

Customer-Centric Service: Providing end-to-end technical support, alternative sourcing consultation, and door-to-door delivery.

04 Company Background/Directors' Rationale

Riscella Enterprises Limited is a highly specialized scientific partner and direct distributor of advanced analytical chemistry solutions, instrumentation, and premium laboratory consumables within East Africa. We deliver verified supply-chain continuity to optimize accuracy, throughput, and research reproducibility across mission-critical research and manufacturing environments. Riscella Enterprises Limited was established by a board of chemical scientists and laboratory technologists to address the systemic challenges of supply chain fragmentation, inconsistent chemical lot purities, and extended procurement lead times that frequently stall industrial manufacturing lines and academic research cycles in the region. Our primary operations center exclusively on the compliance-verified sourcing, cold-chain transport, and technical deployment of analytic equipment, analytical standards, and specialized reagents for high-throughput laboratory networks.

05 Board of Directors & Scientific Leadership

Riscella Enterprises Limited was established and is strategically driven by a distinguished Board of Directors comprising seasoned chemical scientists and elite laboratory technologists. Unlike traditional logistics or trading entities, our leadership possesses deep academic and practical foundations in advanced analytical chemistry solutions, technical instrumentation, and bio-chemical molecular behaviors. This deep-rooted scientific expertise shapes our strict compliance frameworks, our meticulous supplier auditing criteria, and our capability to provide high-level alternative sourcing consultations. By speaking the exact technical language of your lab managers, QA directors, and chemical

engineers, our founders ensure that every product recommendation directly optimizes your assay accuracy, throughput, and research reproducibility.

06 Regulatory Framework Alignment

Riscella Enterprises Limited operates under stringent quality management frameworks to ensure your laboratory is always audit-ready:

National Drug Authority (NDA) Guidelines: Sourcing structures operate in strict compliance with NDA Uganda guidelines for the validation, safe clearance, and handling of pharmaceutical raw materials, active reagents, and medical devices.

Uganda National Bureau of Standards (UNBS): All digital analytical scales, platforms, and validation mass pieces are calibrated to guarantee precise traceable alignment with statutory metrology benchmarks. Our products fully support testing routines within UNBS Recognized Laboratories.

Health, Safety & Chemical Security: We strictly abide by local regulations governing hazardous substances, maintain tight records of controlled chemical precursors, and provide Transport Emergency Cards (TREMCARDs) for hazardous material transits.

07 Authorized Brands & Global Portfolios

We maintain direct distribution relationships with world-class scientific brands to guarantee absolute batch consistency and analytical reproducibility:

Merck / Sigma-Aldrich: Premium global standards for high-purity analytical reagents, HPLC solvents, reference materials, and life science research chemicals.

Loba Chemie: Cost-effective, high-quality laboratory reagents, industrial fine chemicals, and staining solutions ideal for daily production testing.

Pallav: Comprehensive range of analytical reagents, biochemicals, and high-purity laboratory solvents for manufacturing quality control.

Actylis / Finar: Reliable manufacturing-grade raw materials, excipients, and customized chemical ingredients for pharmaceutical and food production.

Reagecon: The world's leading manufacturer of physical and chemical standards, certified reference materials (CRMs), and pH buffer solutions.

Fisher Scientific: Trusted laboratory consumables, premium glassware, safety gear, and testing equipment built for heavy industrial usage.

08 Core Product Categories

CATEGORY	PRODUCT RANGE	APPLICATIONS
Laboratory Chemicals & Solvents	AR/ACS/HPLC grade solvents; high-purity hydrochloric, nitric, sulfuric and acetic acids; bases, salts and bulk industrial testing compounds.	Chromatography, spectrophotometry, industrial titrations and routine organic/inorganic synthesis.
Reagents & Analytical Test Kits	Standard volumetric solutions, pH buffers, indicators, biochemical reagents, cell culture media, staining solutions and chlorine test reagents.	Quantitative analysis, microbial testing, food safety validation, waste-water management and QC auditing.
Laboratory Consumables & Gear	Heavy-duty borosilicate glassware (beakers, flasks, burettes, pipettes), plasticware (carboys, micro-pipettes), Whatman filter papers and syringe filters.	Liquid handling, sample filtration and contamination-free chemical processing.
Personal Protective Equipment (PPE)	Premium nitrile gloves, chemical-resistant safety goggles and laboratory protective aprons.	Personnel protection in hazardous or high-throughput testing environments.

Custom reagent formulations

Custom reagent formulations can be prepared strictly according to your specific production line Standard Operating Procedures (SOPs).

09 Market-Specific Customer Solutions

Our business model is specifically tailored to meet the strict technical, documentation, and economic demands of four key market segments:

Industrial Quality Control (QC) Laboratories

Our Solution: We provide regular, predictable supplies of volumetric solutions, titration reagents, indicators, and durable glassware for daily batch testing.

Value: We keep food, beverage, cosmetics, textile, cement, and water treatment factories fully compliant with local market standards, preventing costly batch rejections.

Pharmaceutical Industries

Our Solution: We supply premium clean-room consumables and raw materials that comply strictly with international Pharmacopeia standards.

Value: Every single delivery is backed by full batch traceability documentation, ensuring your raw materials easily pass regulatory scrutiny.

Research Institutes & National Laboratories

Our Solution: We deliver molecular biology grade reagents, specialized assay kits, and Certified Reference Materials (CRMs).

Value: We provide the precise, high-purity standards required for internationally funded environmental, agricultural, and medical research projects.

Universities & Higher Education

Our Solution: We equip academic chemistry, biology, pharmacy, and engineering departments with routine analytical reagents and consumables.

Value: We offer budget-friendly options for undergraduate training labs alongside high-purity solvents to support advanced researchers aiming for high-impact publishing.

10 Strategic Client Portfolio

We are privileged to serve as an approved technical supply partner for some of the most prominent, high-capacity pharmaceutical manufacturing operations and healthcare production plants across East Africa. Our capabilities are proven by our ongoing support for industry leaders, including:

DEI Biopharma: Supporting large-scale, cutting-edge biological and pharmaceutical manufacturing with highly precise reagents and high-purity processing materials.

Quality Chemical Industries LTD (QCIL): Meeting the rigorous, high-throughput demands of World Health Organization (WHO)-compliant manufacturing lines with robust documentation, traceability, and batch consistency.

KPI (1996) LTD: Supplying reliable production chemicals and durable laboratory assets to maintain seamless continuity in essential regional pharmaceutical production.

LABOPHAR Limited (Rwanda): Extending our supply chain efficiency across regional borders, proving our cross-border logistics capability to supply standard-compliant testing inventory to Rwanda's pharmaceutical sector.

11 Success Highlights

DEI Biopharma

Success Statement: Successfully integrated specialized analytical compounds and high-purity inputs into their cutting-edge biological production pipelines, safeguarding early-stage testing accuracy and regulatory alignment.

Quality Chemical Industries LTD (QCIL)

Success Statement: Delivered consistent, high-volume batches of internationally certified standards and reagents, directly supporting their World Health Organization (WHO)-compliant manufacturing lines and helping eliminate batch rejection risks.

KPI (1996) LTD

Success Statement: Maintained zero-downtime supply continuity for core testing chemistry and durable laboratory glassware, keeping their long-running essential regional pharmaceutical production lines smoothly operational.

LABOPHAR Limited (Rwanda)

Success Statement: Demonstrated reliable cross-border logistics by successfully navigating international regulatory clearances to deliver traceable pharmacopeia-grade laboratory assets directly to their Rwandan testing centers.

12 Why Partner with Riscella? (Our Competitive Advantage)

Rigorous Quality Documentation: We do not just deliver chemicals; we deliver confidence. Every chemical batch is accompanied by a Certificate of Analysis (CoA) and Material Safety Data Sheet (MSDS) to satisfy UNBS and international audit mandates.

End-to-End Cold Chain Logistics: Sensitive biological reagents, enzymes, and unstable standard solutions are managed via specialized cold-storage transit to guarantee molecular stability upon arrival at your facility.

Elimination of Stockout Risks: By maintaining a robust local inventory of high-turnover industrial reagents in Kampala, we protect your business from international logistics delays and sudden market shortages.

Expert Technical Consultation: Our technical sales team is composed of trained biochemists and industrial chemists. We do not just take orders; we help troubleshoot assay compatibility and recommend functional chemical alternatives to optimize your throughput.

13 Procurement & Ordering Process

We make product sourcing seamless, transparent, and audit-ready through our structured, four-step procurement framework:

Step 1: Request for Quotation (RFQ)

Submit your required item list, CAS numbers (if applicable), preferred brand standards, and volume requirements to riscellaenterpriseslimited@gmail.com or call our technical desk at +256 705 728 194.

Step 2: Technical Review & Proforma Issuance

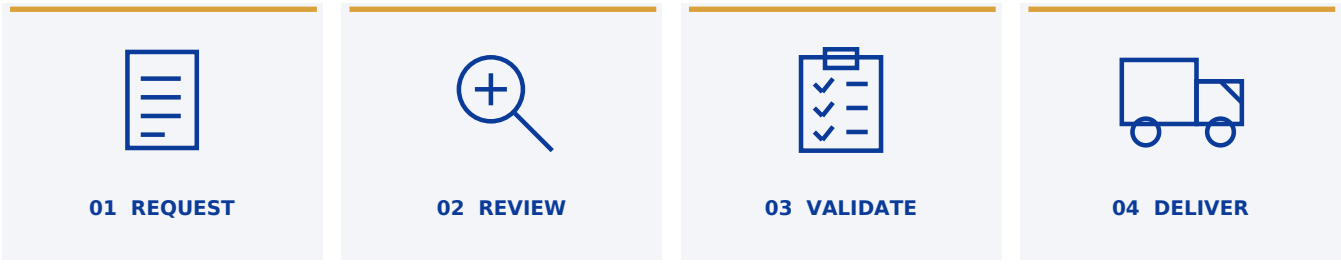

Our internal team of chemical scientists reviews your request to verify parameter matching, grade compliance, and lot stability. We then issue an itemized Proforma Invoice (PI) stating localized stock availability, lead times, and competitive pricing.

Step 3: Verification & Order Validation

Upon your team's confirmation and generation of a Purchase Order (PO), our logistics crew clears the batch internally. If required, we prepare technical compliance data packages, including advance digital copies of the Certificate of Analysis (CoA).

Step 4: Compliance-Verified Delivery

Orders are safely dispatched from our Kampala facilities. We manage secure transit (utilizing specialized cold chain storage for biologicals and TREMCARD packaging for hazardous chemicals) for direct, door-to-door delivery straight to your store or laboratory network.
